SUMMARY

Detail-oriented machine learning engineer with experience in data visualization, statistical analysis, and business intelligence. Proficient in Python, SQL, and Power BI to derive meaningful insights from complex datasets. Skilled in developing interactive dashboards to communicate insights effectively to stakeholders. Passionate about transforming raw data into actionable strategies that drive business growth.

WORK EXPERIENCE

Data Analyst, Elevate Labs

June 2025-May2025

- Contributed to real-world projects by analyzing and interpreting data to drive insights.
- Demonstrated analytical thinking and problem-solving skills in a professional environment.
- Assisted in data visualization and reporting to support business decisions.
- Showcased strong commitment and professionalism throughout the internship.

Tata Data Visualization: Empowering Business with Effective Insights Job Simulation on Forage
- March 2025

- Completed a simulation involving creating data visualizations for Tata Consultancy Services
 - Prepared questions for a meeting with client senior leadership
 - Created visuals for data analysis to help executives with effective decision making
-

EDUCATION

Bachelor of Technology in Computer Science
Specialization-Data Science and Artificial Intelligence
Shri Ramswaroop Memorial University
Current Cgpa-7.70

Oct 2022-July 2026

Senior Secondary (Class 12) - Science
The Lucknow Public Collegiate, CBSE

2021- 2022

Secondary (Class 10)
The Lucknow Public Collegiate, CBSE

2019- 2020

Technical Skills

- | | | |
|-----------------|----------------------|------------|
| • Python | • Data Visualization | • React js |
| • Power Bi | • MySQL | • CSS |
| • Numpy | • PostgreSQL | • Pandas |
| • Data Analysis | • Machine Learning | • HTML |
-

PROJECTS

Heart Disease Prediction – Data Analysis Project

- Analyzed a health dataset to identify risk factors for heart disease using Python, Pandas, and Seaborn. Conducted data cleaning, correlation matrix analysis, and visualizations to reveal
- patterns in cholesterol levels, heart rate, and blood pressure. Found that older individuals tend to have higher cholesterol and are more prone to heart disease and chest pain, while younger
- individuals achieve higher heart rates.

Guesser Game – Python-Based Interactive Game

- Developed an interactive number guessing game using Python, leveraging loops, conditionals, and user input handling. Implemented logic for random number generation and optimized game
- mechanics for an engaging user experience.

Project Link:-https://github.com/komal05-web/Guesser_game-using-python.git

Movie Recommender System using python

Python, scikit-learn

- Built a personalized recommendation engine using Collaborative & Content-Based Filtering on IMDb datasets.
 - Implemented data preprocessing, feature engineering, and ML models with Python (Pandas, Scikit-Learn, TensorFlow).
-
